<i>php</i> laravel/framework (Composer)	<6.20.45,>=7, <7.30.7,>=8, <8.83.28,>=9, <9.52.17,>=10, <10.48.23,>=11, <11.31.0	6.20.45,7.30.7,8.8 3.28,9.52.17,10.4 8.23,11.31.0

Severity

High

CVE ID

CVE-2024-52301

Weaknesses

No CWEs

Description

Description

When the `register_argc_argv` `php` directive is set to `on` , and users call any URL with a special crafted query string, they are able to change the environment used by the framework when handling the request.

Resolution

The framework now ignores `argv` values for environment detection on non-cli SAPIs.
