Cleaning Business Software

Enable clients to request your cleaning services online with our cleaning service software!

Version: 1.0

Installing our cleaning service booking script will add a smart and user-friendly inquiry functionality to your website. You can set an hourly rate for your cleaning services, describe your standard cleaning package, and offer additional services charged depending on the time needed. Our PHP script for cleaning businesses will help you manage customer requests and process payments through an intuitive Admin Panel. Get our cleaning jobs booking script and streamline your commercial cleaning business.

Product Highlights

An online cleaning service booking system is the missing piece on all websites that offer cleaning services but still lack an automated request form and payment module. The front-end interface of our cleaning business software will seamlessly fit in with any website thanks to the wide variety of color schemes you can choose from. Below are the standard features of the cleaning service management software:

Manage Inquiries

Review all inquires – the ones made via the online request form or the ones added manually by

Responsive Front End

Thanks to the mobile-friendly UI, customers can request your cleaning services from all desktop

Set Price Rates

The cleaning service scheduling software allows you to add a price per hour for your standard cleaning service and a separate price for cleaning materials – if they are not available at the client's premises.

Email & SMS Notifications

Customize autoresponder messages that are sent both to clients and admins upon new request, payment, or cancellation. You need to obtain an API key from us to enable the SMS feature.

Offer Extra Services

Provide as many additional services as you wish (carpet cleaning, window cleaning, ironing, etc.) and specify the respective time needed. They will be automatically calculated and added to the final price.

Translation Tool

Change the language of the cleaning service booking script from English to any other language with the help of our translation module. You can translate both the front-end and the back-end titles.

Process Payments

The PHP script for cleaning services has a built-in functionality allowing both offline and online payments. PayPal and Authorize.net are set up by default but you can also request other payment gateways.

PHP Source Code Customization

Get the Cleaning Business Software with a Developer License and modify the source code. We can also customize the cleaning service booking script for you upon request. Compare licence options...

# Cleaning Business Software

Intuitive online service scheduling

The cleaning service software adds a simple request form to your cleaning company site. Clients can schedule their preferred services in less than 5 minutes – the clean-cut UI and informative instructions will quickly guide them to the checkout. Your customers can either purchase a one-time cleaning or order a recurring job with as many follow-ups as they like, either once or several times per week.

Mobile-friendly front end

No separate mobile app is needed – your customers can request your cleaning services from any device, including desktop computers, tablets, iOS and Android mobile devices, etc. Our PHP script for cleaning service businesses has a responsive UI and 10 switchable color schemes so you can find the one that fits your website branding.

Latest inquiries and schedule

Optimize your workflows thanks to our custom-built Admin Panel. It features an intuitive dashboard that opens after you log in to the Cleaning Business Software. The dashboard will help you keep track of recent inquiries and services scheduled for the current day. You can also use the administration page to add clients and appointments manually.
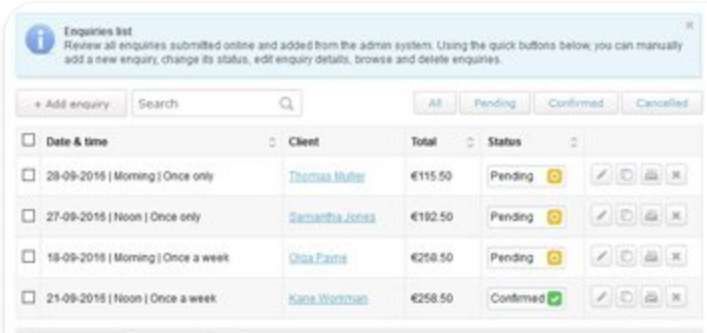

Manage inquiries

See all client inquiries at a glance, change their status with a single click, review details, print out and copy appointments. With our smart cleaning service scheduling software, business owners have full control over customer requests.

+ Cleaning materials

PRICE   €305.00

Oven Cleaning

Cleaning service prices

Set an hourly rate for your services and a separate price for cleaning supplies if the client doesn't provide them. Specify cleaning time per extra bed, bathroom, or other room. The final price is calculated depending on property size.

Offer extra services

In addition to the standard service package, you can provide customers with other services such as window cleaning, carpet cleaning, ironing, etc. You can add as many extras as you wish and set a fixed duration for each activity.

Emails

Option	Value
Notifications	New enquiry received email
New enquiry received email Select 'Yes' if you'd like to let your customers know that you received their enquiries.	Yes
New enquiry confirmation subject	Enquiry Received

Payment options

Process various online and offline payments. Authorize.net and PayPal are available by default with our cleaning service software solution and you can request other payment gateways. Your users will also be able to pay by cash, bank transfer, and credit card if you enable those options. If necessary, you can temporarily switch payments off altogether and only accept bookings.

Notifications

Our PHP script for cleaning services lets you automate email and SMS messaging thanks to a built-in notifications plugin. It can automatically send email & SMS alerts both to users and clients upon a new inquiry, successful payment, or cancellation. You can customize the messages using predefined tokens available in the Admin Panel settings.

Translate all texts

If you want to change the default language of the Cleaning Business Software, you can translate all front-end and back-end system messages using the unique text IDs or by importing a CSV file with all titles.

Collect customer details

When new customers sign up, you can use the contact details from their inquiry forms to create and update your client database. This will help you target your email marketing campaigns or contact clients in other relevant cases.

Customize the inquiry form

Use the simple drop-down menus to select the standard and required fields on your online inquiry form. We would advise you to keep the CAPTCHA field required to prevent spam messages.

Editable terms & conditions

Enter your company terms into the cleaning booking system's back end and request your customers to read and accept them before submitting their cleaning service request. You can update the terms and conditions anytime, if necessary.
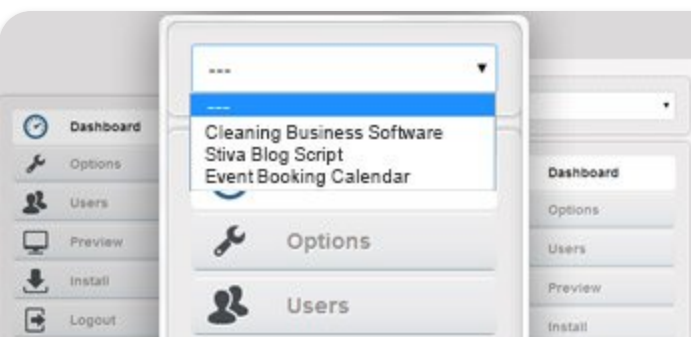

Using the One admiN feature, you can set up a single login screen for multiple PHPJabbers scripts. Once enabled, you can switch between script admins using a simple dropdown menu. Read more about One admiN here.

Our cleaning service booking script uses the latest PHPJabbers framework specially developed to ensure excellent performance and flawless work even with heavy databases. JavaScript and Ajax loading is used on the front end to speed up the pages and dynamically update the software in real time without having to refresh the whole web page. Watch a video demonstration of one of our scripts having one million listings added and eight million records in the database.

Easy installation

An installation wizard will automatically install the cleaning service company script for you. Just upload the files onto your hosting account and the wizard will start. Then, to deploy our PHP script on your cleaning business site, just copy-paste a few lines of JavaScript integration code onto the right web page. You can check out the tutorials in our knowledge base to see how easy the setup process is, with examples for WordPress and Joomla websites. Or request installation assistance and we'll do it for you!
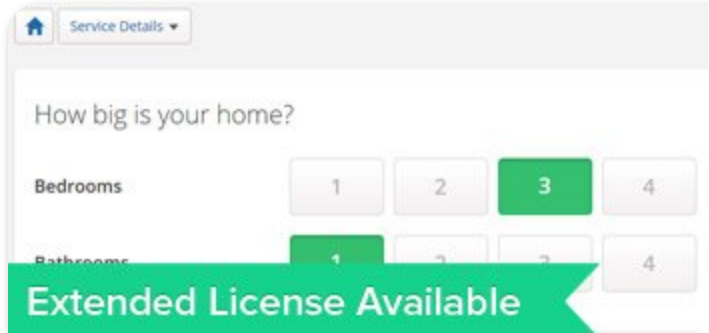

Developer-friendly license

If you're a web developer, you can modify the CSS, HTML, and JavaScript code of the cleaning service scheduling software on your own. Buy the Developer License and you'll receive access to the source code of the script and a guide to our framework. Or, we can do the custom modifications to the PHP script for you. To request a customization, just contact us.

More key software features

Our Cleaning Business Software comes with the following special features: Installation Wizard & Cross-Domain Integration, High-Performance PHP Framework & Protection Against SQL Injections, One admiN Module, Translation Module & Backup Tool, User Permissions & Encrypted Passwords, Clean PHP Code & Developer License. You may also benefit from our extra services: Installation Support, Free Updates, Remote Hosting, Payment Gateways Integration, Web SMS, Custom Modifications, Extended License Program.

Testimonials

Let our clients share their experience with our PHP script for the cleaning business industry and how it has improved their online business.

"

Just thought I'd drop you an email of appreciation! After testing various PHP scripts with varying amounts of stress and hassle, I installed your cleaning service software and it works a treat! Easy installation, easy setup, easy config, brilliant. Thanks for the great script.

Kris Thain

"

I was looking for a PHP booking script and came across phpjabbers.com, but I wanted quite a few mods done. These guy sorted them out quickly and efficiently. The after sales support is fantastic as well. Thanks, team!

Mark Thompson

"

Cleaning service software is great! They turned my emergency into a success in no time! Helpful and prompt, and priced way below the competition! I am recommending PHPJabbers to everyone!
