3	<code>Plugin Name: GmapsMania</code>
4	<code>Plugin URI: http://www.wpmania.it/google-maps-mania-plugin/</code>
5	<code>Description: This plugin allows you to directly embed Gmaps code in your posts or pages using the [gmap] shortcode. 1. Add a custom field with key <i>gmap</i> and value the whole gmap code that you obtain from google, 2. Write [gmap] in your page or post, where you want the map to appear. Save and publish!</code>
