net/iucv: Fix size of interrupt data

[Upstream commit 3d87debb8ed2649608ff432699e7c961c0c6f03b]

iucv_irq_data needs to be 4 bytes larger.
These bytes are not used by the iucv module, but written by
the z/VM hypervisor in case a CPU is deconfigured.

Reported as:
BUG dma-kmalloc-64 (Not tainted): kmalloc Redzone overwritten

```
