Improper Authorization

[CVSS:3.1/AV:N/AC:L/PR:N/UI:N/S:U/C:H/I:H/A:H](#)

CVE	CVE-2025-3918
CVSS	9.8 (Critical)
Publicly Published	May 2, 2025
Last Updated	May 3, 2025
Researcher	kr0d

Description

The Job Listings plugin for WordPress is vulnerable to Privilege Escalation due to improper authorization within the register_action() function in versions 0.1 to 0.1.1. The plugin's registration handler reads the client-supplied \$_POST['user_role'] and passes it directly to wp_insert_user() without restricting to a safe set of roles. This makes it possible for unauthenticated attackers to elevate their privileges to that of an administrator.
