Publicly Published	May 6, 2025

Description

The WPshop 2 – E-Commerce plugin for WordPress is vulnerable to Insecure Direct Object Reference in versions 2.0.0 to 2.6.0 via the `callback_generate_api_key()` due to missing validation on a user controlled key. This makes it possible for authenticated attackers, with Subscriber-level access and above, to create valid API keys on behalf of other users.
