|--------------------|---|
| Patch Package: | OTP 25.3.2.21 |
| Git Tag: | OTP-25.3.2.21 |
| Date: | 2025-05-08 |
| Trouble Report Id: | OTP-19577, OTP-19599, OTP-19605, OTP-19608, OTP-19625 |
| Seq num: | CVE-2025-46712, ERIERL-1220, GH-9707, GH-9720, PR-9696, PR-9724, PR-9765, PR-9767 |
| System: | OTP |
| Release: | 25 |
| Application: | erts-13.2.2.16, kernel-8.5.4.6, ssh-4.15.3.13 |
| Predecessor: | OTP 25.3.2.20 |

Check out the git tag OTP-25.3.2.21, and build a full OTP system including documentation. Apply one or more applications from this build as patches to your installation using the 'otp_patch_apply' tool. For information on install requirements, see descriptions for each application version below.

--- erts-13.2.2.16 -----

Note! The erts-13.2.2.16 application **cannot** be applied independently of other applications on an arbitrary OTP 25 installation.

On a full OTP 25 installation, also the following runtime dependencies have to be satisfied:

- kernel-8.5 (first satisfied in OTP 25.1)
- stdlib-4.1 (first satisfied in OTP 25.1)

--- Fixed Bugs and Malfunctions ---

OTP-19577 Application(s): erts
 Related Id(s): ERIERL-1220, PR-9696

Fixed an emulator crash when setting an error_handler module that was not yet loaded.

OTP-19599 Application(s): erts
 Related Id(s): PR-9724

Fixed a rare bug that could cause an emulator crash after unloading a module or erasing a persistent_term.

Full runtime dependencies of erts-13.2.2.16: kernel-8.5, sasl-3.3, stdlib-4.1

--- kernel-8.5.4.6 -----

Note! The kernel-8.5.4.6 application **cannot** be applied independently of other applications on an arbitrary OTP 25 installation.

On a full OTP 25 installation, also the following runtime dependencies have to be satisfied:

- erts-13.1.3 (first satisfied in OTP 25.2)
- stdlib-4.1.1 (first satisfied in OTP 25.1.1)

--- Fixed Bugs and Malfunctions ---

OTP-19605 Application(s): kernel
 Related Id(s): GH-9720, PR-9765

With this change, disk_log will not crash when using chunk_step/3 after log size was decreased.

OTP-19608 Application(s): kernel
 Related Id(s): GH-9707, PR-9767

With this change, disk_log will not run into infinite loop when using chunk/2,3 after log size was decreased.

Full runtime dependencies of kernel-8.5.4.6: crypto-5.0, erts-13.1.3, sasl-3.0, stdlib-4.1.1

--- ssh-4.15.3.13 -----

The ssh-4.15.3.13 application can be applied independently of other applications on a full OTP 25 installation.

--- Fixed Bugs and Malfunctions ---

OTP-19625 Application(s): ssh
 Related Id(s): CVE-2025-46712

Fix KEX strict implementation according to
draft-miller-sshm-strict-kex-01 document.

Full runtime dependencies of ssh-4.15.3.13: crypto-5.0, erts-11.0,
kernel-6.0, public_key-1.6.1, runtime_tools-1.15.1, stdlib-3.15

--- Thanks to -----

João Henrique Ferreira de Freitas, Lý Nhật Tâm
