

Submit #558352: D-Link DIR-605L 2.13B01 Buffer Overflow

Title D-Link DIR-605L 2.13B01 Buffer Overflow

Description d-link DIR-605L has buffer overflow vulnerability in formSetWAN_Wizard55. The program receives the value of the host field through the websGetVar function, concatenates it into a formatted string using the sprintf function. Since the sprintf lacks the boundary check and the attacker's input length isn't checked either, buffer overflow exists.
