What is Sylius?

Sylius is an Open Source Headless eCommerce Platform for mid-market and enterprise brands that need custom solutions. With a modern approach to the professional development of projects, it allows the evolution of your digital stack at the pace that beats your competitors and delivers the experience your Customers deserve.

#1 Symfony eCommerce

Quality Standards and No Technical Debt

Given the pace at which the world of commerce changes, you can't afford to do a revolution every few years. You need an evolutionary approach and the highest quality standards. Sylius has these baked-in.

Detect and fix problems before they hit your customers and revenues. Sylius is a pioneer in automated testing of eCommerce platforms and encodes it in your projects. Behavior Driven Development approach makes your team focused on the business value and not just fancy code.

Top brands trust Sylius

We have decided to use Sylius because today it is one of the most used e-commerce platforms in the mid-market sector. This has given us greater agility to advance and improve both the front and the back of our online store.
